SAP Business One® provides all the kit for enhanced sales

GO Sport, a leader in the sports equipment market, worked with SkyTech to consolidate all brands and stores onto one system. Realising SAP Business One was within their budget, all data for over 40 sport brands was quickly transitioned over, making this information available to share between all departments.

Before: Challenges and Opportunities

- · GO Sport's previous system was very basic and lacked the data they needed.
- · As a multi-brand store, management required a POS that could control all the brands and products.
- Hundreds of thousands of item codes needed to be imported over to a new platform that could manage stock seamlessly across all stores.

Why SAP Business One and SkyTech

- SAP Business One matched GO Sport's budget perfectly and included all the features they required in just the one system.
- SAP Customer Checkout could be implemented into SAP Business One.
- The SkyTech team are the best in Jordan they are very professional and helpful 24/7.

After: Value-Driven Results

- Since implementation, purchasing and costs are now managed seamlessly through SAP.
- · All aspects of the business are now fully integrated from the warehouse to finance to POS.
- SAP Customer Checkout offers real-time data, enhancing customer satisfaction.
- Reports are now customizable so management can look at the bigger picture and make business decisions faster.
- GO Sport are fully equipped to expand their business and open new stores thanks to all data being on SAP Business One.

"SAP Business One was perfect, and Skytech was confident they could deliver exactly what we wanted, including SAP Customer Checkout, and implement it across all stores."
